

Colonials for Michael Green

- Dormer Attic options
 - Nantucket
 - Reverse Nantucket
- 18 ft family room, so there is room under the sun for a third car. use spicy cottage colonials as example
- Dormers on optional space Above Garage
- 1 option with hip roofs
- Bowy windows
- Arch windows on second floor above entry in hallway
- Saffronish closets in Entry must be in plan with L-Shape Stair
- This will be broken down into 2 tasks one for Wendy that will take about a day / day and a half, of her going to church.

The other task will be stuff we can do.

I am assumming it will involve these ~~changes~~ following changes:

- 4' knee walls in the Attic, with Dashed in walls, not solid.
- Attic should say optional / future, not Attic.
- No room def. in the marketing just a dimension on inside of walls.
- He would like to have the door from garage to unfinished Basement at the bottom of stairs. (when applies)

- All Garages attached to be 26' x 26'
- Belmont classic will have a future / optional space over the garage. maybe show as having a hallway to it through Bedroom closets instead of stairs from Garage
- Continuous Footings through-out in the basement
- Bow-7 windows
- 4' knee walls in opt / future
- Show a doorway in the Dartmouth, in the masterbath instead of a door.
- For marketing label all Attic windows as optional (not Dormers)
