

Colonials for Michael Green

- Dormer Attic options
 - Nan turret
 - Reverse Nan turret

- 18 ft family room, so there is room under the sun for a third car. use spiky cottage colonials as example
- Dormers on optional space Above Garage

- 1 option with hip roofs
- Bay windows

- Arch windows on second floor above entry in hallway

- Saffronish closets in Entry must be in plan with L-shape Stair

This will be broken down into 2 tasks one for Wendy that will take about a day / day and a half, of her going to church.

The other task will be stuff we can do. I am assuming it will involve these ~~changes~~ following changes:

- 4' knee walls in the Attic, with Dashed in walls, not solid.
- Attic should say optional / future, not Attic.
- No room def. in the marketing just a dimension on inside of walls.
- He would like to have the door from garage to unfinished Basement at the bottom of stairs. (when applies)
