### Proposal Notes

INS-Air Seal	
INS-Batts	
INS-Blown In	
INS-Crawl Space	

**Price \$7,350.00**

We propose hereby to furnish material & labor in accordance with the above specifications. Payment to be made in full in accordance with the terms stated herein. All material is guaranteed to be as specified. All work to be completed in a workman-like manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders and will become an extra charge over and above the estimate. We are not responsible for any provisions within the National Standard Plumbing Code (NSPC). All agreements contingent upon strikes, accidents, or delays beyond our control. Our workers are fully covered by Worker's Compensation Insurance. Please note the following: the number of inches of foam is an overall average and may vary in certain areas. The foam application is not perfectly uniform. In areas to be finished with sheetrock, excess foam will be trimmed to face of stud and placed in dumpster to be provided by customer. If dumpster is not available, excess will be piled for removal by customer, all work areas must be free of debris and any items which might interfere with installation; it is required that spray polyurethane foam insulation is covered with an approved thermal barrier. Local code may require a vapor barrier to be applied over open cell foam. This would be an additional cost unless included in the above proposal. American Building Systems is not responsible for the blower door tests due to variables out of our control

If the above work scope includes closed cell and/or open cell spray foam, all people and/or pets must vacate the property for 24 hours

Initial to Acknowledge \_\_\_\_\_

Payment Terms: NET 30

### ACCEPTANCE OF PROPOSAL

THE ABOVE PRICES, SPECIFICATIONS AND CONDITIONS ARE SATISFACTORY AND ARE HEREBY ACCEPTED. YOU ARE AUTHORIZED TO DO THE WORK AS SPECIFIED.
